Step-1: Brainstorm, Idea Listing and Grouping

Brainstorm & idea prioritization

10 minutes to your team
8 hours to collaborate
25 people coordinated

Share template feedback

Brainstorm

What do you know that can help you address your problem statement?

10 minutes

SRI HARI D

- Filter Overlay/ Panels: These filters appear on the screen of the results
- Oversee Sort: Oversee Sort can provide a single one-tap solution
- various vehicular conditions
- Web application with chatbot

SHAHANA FATHIMA S

- The Proposed model should achieve high accuracy
- Website with Voice support
- Sort Overlay: Filter user can select the model by applying a sort kind or time, and it can be placed on the top, middle, or bottom of the results screen
- Follows Filtering: These filters take up the whole screen of the results

SRIRAM P R

- Website with audio support
- Filter Form: These filters are used in apps with a very large dataset
- Sortform: The sort form may require users to click on the sort, select the sort type, and then click on the "sort" or "done" button
- Data clustering and resampling methods also used

ABINAYA R

- Use Filter to check pricing details
- Using Sort feature for arranging prices range from ascending to descending
- Voice command for application
- Using Flask and heroku Application

Group ideas

Take 10 min. sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

20 minutes

Voice Support

- Web application with chatbot
- Website with Voice support
- Website with audio support
- Voice command for application

Sort by

- Oversee Sort: Oversee Sort can provide a single one-tap solution
- Sort form: The sort form may require users to click on the sort, select the sort type, and then click on the "sort" or "done" button
- Sort Overlay: Filter user can select the model by applying a sort kind or time, and it can be placed on the top, middle, or bottom of the results screen
- Using Sort feature for arranging prices range from ascending to descending

Filters

- Filter Overlay/ Panels: These filters appear on the screen of the results
- Follows Filtering: These filters take up the whole screen of the results
- Filter Form: These filters are used in apps with a very large dataset
- Use Filter to check pricing details

Step-2: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes
